Cortado Corporate Server 4.0 for BlackBerry

Business Solutions for BlackBerry Smartphones

A New Standard in Mobility

Cortado offers complete independence from location-bound workplaces and PC-based communication methods. It also increases productivity by extending the network and desktop through the smartphone, giving users access to information while mobile. By equipping BlackBerry® smartphones with nearly all classic desktop functions, Cortado transforms a BlackBerry smartphone into the new mobile office.

Manage

Organize files and folders in the company network with cut, copy, paste, rename, create, and delete.

Query database reports

Access, view, print, e-mail, or fax database reports.

Create PDFs

Create PDF files and save, print, or e-mail newly created PDFs.

E-mail

Send files saved on the company network or in online storage with "Send as e-mail".

View

Access and view files saved in document management systems, on the company network, or in online storage.

« Print

Print documents, attachments, HTML e-mails, websites, tasks, etc. in original format to any Bluetooth®-enabled or network printer.

« Fax

Create faxes quickly with templates directly on a smartphone or send documents to a fax machine.

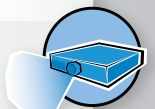

« Scan & Copy

Capture documents with a smartphone camera to copy, print, save to a corporate drive or send via e-mail.

« Present

Present or view documents from a smartphone on a computer screen or projector.

« Use all file formats

Use all available file and photo formats with the option of adding new formats.

» ENTERPRISE SOLUTIONS

Save Costs

- Reduce back office work: True mobile workflows save on operational costs; a mobile user performs most tasks directly on a smartphone without using a laptop or returning to the office.
- Cut hardware costs: Mobile device infrastructure is less expensive to acquire and maintain than traditional desktops.
- Lower costs of data transfer: Smartphones do not require separate WAN and VPN connections, significantly reducing communication costs.

Increase Productivity

- Shorten turnaround times and react quickly: Users can respond instantly to e-mails that require information from the company network, increasing mobile independence and productivity.
- Use time on the road more efficiently: Employees work remotely with access to all information – just as they would in a traditional office setup.
- Optimize teamwork and improve company performance: Mobile workers at different locations can collaborate on projects with access to group files and project folders, streamlining workflow and work processes.

Simplify IT Administration

- Minimize software and hardware maintenance: Cortado Corporate Server provides a mobile device with the functionality of a notebook and the easy administration of a smartphone.
- Integrate into the IT infrastructure: Cortado Corporate Server fully integrates into existing corporate e-mail, file, and network printer environments, as well as user rights management.

Demo Version

A free, fully functional demo version can be found here: www.cortado.com/enterprise

Improve Security

- Secure file transfer: Send highly compressed files over a secure infrastructure.
- Reduce security risks: With Cortado, users can leave laptops behind and also avoid storing documents on the smartphone, significantly reducing the risk of loss and security breaches.
- Complete integration: Even when mobile, company user rights are assumed – with additional options to restrict the user rights of individuals or groups.

Verticals

Cortado targets verticals across the board and focuses on all sizes of businesses with a mobile workforce. Verticals include:

- **Financial:** Management accesses reports and edits presentations with current numbers.
- **Transportation:** Automatically print documents from a vehicle via Push Print; receive and print updated routes without having to return to the office.
- **Insurance:** Advisors access statistics, print contracts, and get signatures on site.
- **Government:** Secure mobile access to information for anyone in the field – from the USDA to the IRS.
- **Healthcare:** Mobile workers, such as home healthcare and traveling nurses, can access updated medical records from patients' homes.
- **Legal:** Access, update, and immediately print contracts or other legal documents; hold ad-hoc presentations during out of office meetings.
- **Construction:** Access and print updated blueprints on-site, regardless of document size.

Cortado Corporate Server increases the range of activities a BlackBerry smartphone can perform, allowing you to leave your laptop at home more and more often!
