Cortado Basic Print enhanced with image printing capability

Print images and photos directly from your BlackBerry smartphone using

Cortado Basic Print

(Berlin, March 3 2009) Cortado, a global leader in mobile applications, is today announcing an enhancement of its basic mobile printing solution 'Cortado Basic Print' to allow users to print images and photos directly from their BlackBerry® smartphone to Bluetooth® enabled printers.

Cortado Basic Print from Cortado, which specializes in mobile business applications, thus establishes a bridge between BlackBerry smartphones and Bluetooth® enabled photo printers available on the market.

"BlackBerry smartphones offer extensive multimedia functions. With Cortado Basic Print, we increase the benefits offered by the integrated camera for both business as well as recreational users," says Carsten Mickleit, Managing Director of Cortado.

In addition to printing photos and images, installing Cortado Basic Print on a smartphone also gives users the option to print e-mails, contacts, notes, tasks and calendar entries. The application supports almost all Bluetooth®-capable photo printers (e.g. Canon, HP and Polaroid) as well as simple text printers (if only text printing is required).

Cortado Basic Print is Cortado's basic solution for mobile printing. The enterprise solution 'Cortado Corporate Server' and the Premium Services of the hosted Cortado Online Services are recommended for printing Office documents, HTML e-mails and websites.

Price and availability

Cortado Basic Print is compliant with all BlackBerry smartphones that have BlackBerry® Device Software v4.2.1 or higher. The software is available now for EUR 29.98 / USD 39.98. To view a free demo, see www.cortado.com/basicprint.

###

Cortado. A Division of ThinPrint

Cortado, as an independently acting division, combines proven expertise in mobile communications technology with over 10 years of experience in building, and globally marketing, enterprise solutions.

Cortado offers complete independence from location-bound workplaces and computer-based communication methods. It increases productivity by extending the corporate network and desktop through the smartphone, giving users access to vital information while mobile. Users can access and save files from a network, as well as print and fax documents directly from his or her smartphone.
