

Gothic Landscape, Inc.

Challenges:

"How many times have you said or heard, 'I'm on my way out, when I get back to office I'll send it to you', or 'I'm at the airport, on the road, or with another client, I will contact my office to send it to you? This was a constant challenge within our organization; as a result we were seeking a solution to cut out much of this wasted time."

Daniel Cullen, IT Director

Solution – Read more on Daniel's experience in his own words:

"Cortado Corporate Server allows anyone to securely access and edit documents from any smart device such as iPhone, iPad or Android, from anywhere they can get an Internet connection.

We no longer have to wait on another person, hoping they can access and send the correct file. I no longer need to worry "what files do I need to download, or transfer ahead?" There is no need to wait for a user to complete a document so I can take it with me. I, instead, am able to logon with my smartphone, review, click send, and I'm done! This can be done from any smart phone, tablet, or laptop.

That, in and of itself, would make for a nice program but it offers much more for the IT department.

One piece that I particularly like is that Cortado Corporate Server has become my private cloud. I control "my cloud" and I don't send my corporate data somewhere else. I am also able to restrict the views, keeping my documents more secure.

I'm discovering the control I have over my mobile devices (MDM) and the way I can push all iOS apps as managed apps to any device. One major advantage, I've found, is that if a user's mobile device is damaged or lost, they can get a new device and I can push all their applications back to the new unit. This can happen anywhere, from any mobile phone or Apple Store, even in another state."

ABOUT GOTHIC LANDSCAPE:

Gothic Landscaping has been providing outstanding service and creating true partnerships for over 25 years. Gothic is currently the largest majority family owned landscape construction company in the nation, according to Landscape Management magazine, and 6th largest nationally overall. www.gothiclandscapeaz.com

"Cortado Corporate Server is recommended for any company who has mobile users, people out in the field. It is a recommended product."

Daniel Cullen, IT Director

ABOUT

CORTADO MOBILE SOLUTIONS

Cortado Mobile Solutions is a wholly owned subsidiary of Cortado Holding AG, and is responsible for all operations relating to the enterprise mobility solution Cortado Corporate Server. The unique enterprise mobility solution offers the perfect balance between security for the organization, easy manageability for the IT department and maximum flexibility for users.

The on-premises software includes all the tools required for successful enterprise mobility; mobile device management, mobile application management and mobile content management, and can be fully integrated into the Windows backend. IT administrators continue to work with their known systems, Active Directory groups and Windows privileges, and users can access network drives, SharePoint and intranet pages directly from their mobile devices.

Cortado Mobile Solutions follows the philosophy that working natively delivers the highest levels of user acceptance. So Cortado's enterprise mobility solution fully supports native app management and instead of focusing on separate storage when it comes to file sharing, enables a direct connection to the corporate network. The result is a significant increase in productivity for mobile employees, improved collaboration among teams as well as convenient management for the IT department.

Cortado's enterprise mobility solution is developed and tested at its headquarters in Berlin, Germany. Also experts in offices in the United States, UK, Australia and Japan, highly-qualified consultants at our Berlin location as well as a trained, worldwide network of channel partners provide presence and support to local customers throughout the world.

Cortado Corporate Server's Management Console allows IT administrators to manage devices, users and applications as well as all the user rights, policies, profiles, certificates and security settings relevant to accessing the corporate network.

Cortado Corporate Server in Use

Pharmaceuticals: Thanks to the Cortado Management Console, administrators can instantly push e-mail accounts as well as Wi-Fi and VPN settings to the mobile devices of new research staff.

Oversee Branch Offices: New smartphones and tablets can be procured locally and still be remotely set up and securely integrated. Cortado Corporate Server pushes the required business apps directly to the devices.

Retail: The project manager photographs a part of a presentation for a new product with his smartphone camera. Thanks to intelligent synchronization it is saved immediately as an encrypted PDF file in the project folder and available for all other team members.

Government: Officials can work on the go within a secure native container. This includes the native e-mail app, secure on-premise file sharing, a secure browser and much more.

Insurance: Need assessments can be carried out onsite with customers via an intranet application in a secure browser, and the result displayed in a customer-friendly format on a tablet, saved as a PDF or printed.

IT: Thanks to managed open in and per app VPN, administrators can be sure that

only secure apps are in use in their environment. With remote partial or full wipe, intervention in due time is possible in case a device is lost, stolen or misused. **Construction:** Managers save large documents such as blueprints to a project folder via drag & drop with their notebook. Project teams access the latest documents with their mobile devices, directly on construction sites.

Executive Management: A CEO can retrieve the latest database reports with the most up-to-date numbers on the way to a board meeting.
