

## KSA Kommunalen Schadenausgleich (KSA) Ostdeutsche Kommunalversicherung auf Gegenseitigkeit (OKV)

### Challenge:

The KSA and OKV were looking for an enterprise mobility solution to improve the productivity and ability to act of their employees who also partly work when mobile. Management, IT department and sales staff should have the option to access and edit work documents when mobile. It was important above all to enable access to the file system and the intranet. Of course, the mobile devices should also be secure and easy to manage.

After an evaluation phase, the company chose Cortado Corporate Server.

Management, IT departments and sales staff got iPhones and iPads that they can also utilize for personal use. One particular challenge was the fluid access to the intranet sites of the KSA and the OKV. Here there are forms created by company, specifically tailored to the requirements of the KSA and the OKV, such as counseling reports. Through Cortado Corporate Server, the sales staff can now access the intranet with their mobile devices, fill out the forms online with customers on-site and save them directly to the company network.

**"MDM is offered by many, but the major benefit of Cortado Corporate Server is mobile access to the file system and intranet. You get to your documents quickly and, above all, easily. No other solution was able to do that,"** said Jörn Poerschke, General Manager of KSA

Verwaltungsgesellschaft mbH. **"The user really is the focus here because he needs mobile access to documents."**

For Andreas Drobeck, group leader of IT operations, the security and the easy management of devices were crucial. **"The AD integration of Cortado's solution is important,"** said the IT expert. **"You don't have to provide any further user guidance. Once installed and set up, it runs alongside. And you don't have to look at the Cortado Management Console every day."**

### ABOUT KSA KOMMUNALER SCHADENAUSGLEICH

The KSA of the states Brandenburg, Mecklenburg-Vorpommern, Saxony, Saxony-Anhalt and Thuringia was established on October 11, 1990, in Berlin by the representatives of 57 municipalities, cities and counties. Since its founding, it has enjoyed extremely successful development.

What started as a small office in Berlin-Tempelhof in 1991 is today an efficient local self-help organization of eastern Germany. More than 5,000 members participate in the compensation fund financed according to the shared contribution principle.

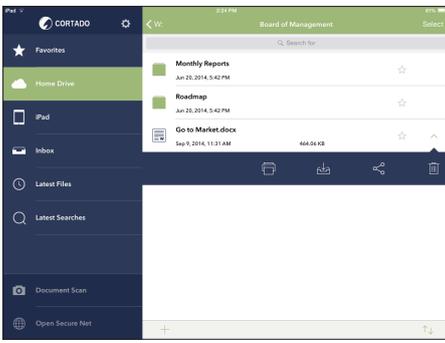

### ABOUT OSTDEUTSCHE KOMMUNAL- VERSICHERUNG AUF GEGENSEITIGKEIT

The OKV was established as a property insurer in Berlin on April 23, 1991, by municipalities in Brandenburg, Mecklenburg-Vorpommern, Saxony, Saxony-Anhalt and Thuringia and western Germany local government insurers.

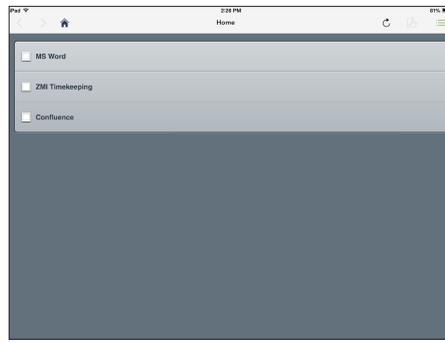

Since then, as special insurance, they have provided their members with safety around municipal buildings and objects. In recent years, however, the OKV has constantly expanded its insurance coverage. Today their insurance covers loss of or damages to material property, from the lost keychain to the grand piano all the way up to a major fire in a village hall. OKV insurance coverage also offers protection from damages to assets, such as financial losses resulting from faulty bidding processes or fraud committed in financial institutions.

The OKV supplements the range of products from the KSA – which offers its members liability, motor vehicle and accident coverage – with all kinds of property and natural disaster insurance and the financial assets damages insurance. In cases where coverage from the KSA is not available, the OKV also offers liability and accident insurance coverage.

Facts	
Client:	KSA and OKV
Industry:	Insurance
Solution:	Cortado Corporate Server
Hardware:	iPads and iPhones

Cortado Corporate Server enables access to company files as well...

... as to intranet applications.

## Cortado Corporate Server in Use

**Pharmaceuticals:** Thanks to the Cortado Management Console, administrators can instantly push e-mail accounts as well as Wi-Fi and VPN settings to the mobile devices of new research staff.

**Oversee Branch Offices:** New smartphones and tablets can be procured locally and still be remotely set up and securely integrated. Cortado Corporate Server pushes the required business apps directly to the devices.

**Retail:** The project manager photographs a part of a presentation for a new product with his smartphone camera. Thanks to intelligent synchronization it is saved immediately as an encrypted PDF file in the project folder and available for all other team members.

**Government:** Officials can work on the go within a secure native container. This includes the native e-mail app, secure on-premise file sharing, a secure browser and much more.

**Insurance:** Need assessments can be carried out onsite with customers via an intranet application in a secure browser, and the result displayed in a customer-friendly format on a tablet, saved as a PDF or printed.

**IT:** Thanks to managed open in and per app VPN, administrators can be sure that only secure apps are in use in their environment. With remote partial or full wipe, intervention in due time is possible in case a device is lost, stolen or misused.

**Construction:** Managers save large documents such as blueprints to a project folder via drag & drop with their notebook. Project teams access the latest documents with their mobile devices, directly on construction sites.

**Executive Management:** A CEO can retrieve the latest database reports with the most up-to-date numbers on the way to a board meeting.

## ABOUT CORTADO MOBILE SOLUTIONS

Cortado Mobile Solutions is a wholly owned subsidiary of Cortado Holding AG, and is responsible for all operations relating to the enterprise mobility solution Cortado Corporate Server. The unique enterprise mobility solution offers the perfect balance between security for the organization, easy manageability for the IT department and maximum flexibility for users.

The on-premises software includes all the tools required for successful enterprise mobility; mobile device management, mobile application management and mobile content management, and can be fully integrated into the Windows backend. IT administrators continue to work with their known systems, Active Directory groups and Windows privileges, and users can access network drives, SharePoint and intranet pages directly from their mobile devices.

Cortado Mobile Solutions follows the philosophy that working natively delivers the highest levels of user acceptance. So Cortado's enterprise mobility solution fully supports native app management and instead of focusing on separate storage when it comes to file sharing, enables a direct connection to the corporate network. The result is a significant increase in productivity for mobile employees, improved collaboration among teams as well as convenient management for the IT department.

Cortado's enterprise mobility solution is developed and tested at its headquarters in Berlin, Germany. Also experts in offices in the United States, UK, Australia and Japan, highly-qualified consultants at our Berlin location as well as a trained, worldwide network of channel partners provide presence and support to local customers throughout the world.
