

## SKOK Wesola

- **Challenge:** SKOK Wesola offers customers in over 70 branches in Poland a wide range of financial services. Smartphones and tablets belonging to employees in management, sales and IT needed to be easily and securely integrated into the existing IT infrastructure with various mobile operating systems and high data security standards.
- **Solution:** Cortado Corporate Server provides not just users with the possibility to work and print on the go, but also allows IT to easily manage mobile devices in line with the existing rights structure.
- **Quote:** *“Many employees wanted to access and print documents in the company with their smartphones and tablets. With Cortado Corporate Server we found the right solution to optimize our work processes and at the same time increase security.” Dawid Tarnowski, IT Director, SKOK Wesola*
