

## ASSA ABLOY Sicherheitstechnik GmbH

- **Challenge:** ASSA ABLOY Sicherheitstechnik GmbH is the professional partner worldwide in mechanical and electromechanical security solutions for safety, security, and convenience in buildings. Sales reps and executives needed a solution that would allow them mobile access to presentation materials on the corporate network.
- **Solution:** Cortado Corporate Server makes it possible for the company's employees to use their iPads to access PowerPoint files and other files in the normal network structure in order to use them and present them on site to the clients.
- **Quote:** *"Our colleagues are thrilled that they can now access up-to-date presentations from anywhere and are able to use them for sales pitches. The feedback is positive. We are planning to expand the number of users and to add printing functionality."* Karsten Kunze, System Administrator, ASSA ABLOY Sicherheitstechnik GmbH
