

Bank of Namibia

- **Challenge:** Senior management at the Bank of Namibia are often travelling. Whether journeying from their home offices or between company sites, they wanted the freedom to be able to work while on the go.
- **Solution:** Cortado Corporate Server enabled the bank to securely integrate smartphones as well as iPads into the corporate IT environment.
- **Result:** Employees using iPads, iPhones or BlackBerrys are now free to work even when on the go. Files and folders are always available. Thanks to the solution's HTML5 client, users can also access files with any browser-enabled device e.g. from their home office.
- **Quote:** *"I first tried Cortado Workplace which I really liked and when I heard there was also a corporate solution for file access, I knew it would perfectly fit our needs. Aside from being easy to set up, further administration is minimal. Users can start working immediately with it and additionally it is very competitively priced," Marsorry Ickua, IT Director, Bank of Namibia*
