

PERI GmbH

- **Challenge:** Construction plans are send by plane to international construction sites, resulting in high cost and delays.
- **Solution:** With Cortado Corporate Server Construction Plans are emailed and printed our to DIN A0-Plotters directly from a BlackBerry smartphone on site, via Bluetooth.
- **Result:** Saving cost for sending the construction plans and enhancing productivity on construction sites (no delays for waiting on current construction plans anymore).
- **Quote:** *“By using Cortado we’re able to eliminate considerable time delays and thus save considerably on cost. We can now react flexible and fast to any changes. The site managers are enthusiastic.” Rainer Backeler, PERI GmbH*

Industry:
Construction

Solution:
Cortado Corporate Server

Hardware: BlackBerry smartphones, MPI Tech Bluetooth Printer Adapter

Environment:
BlackBerry Enterprise Server
