

Aurora Fashions

- **Challenge:** Senior managers at Aurora Fashions, the group behind some of the UK's most respected women's fashion brands (Coast, Oasis and Warehouse) needed to be able to access their corporate files on the go without having to lug a laptop around with them. As they frequently travel to and from their 1.197 stores on a regular basis, a simple and secure solution was needed.
- **Solution:** Cortado Corporate Server enabled Aurora Fashions to integrate the management's iPads into the company's corporate IT environment.
- **Result:** Senior management using their iPads are now able to print, share files and preview documents while on the go. Files and folders are always available. The initial rollout with senior managers was such a success that the solution has been extended to every manager in the company. Cortado's unmatched user experience has allowed Aurora Fashions to eliminate the need for laptops, catering to their employees needs for simplicity, ease of use and ready availability at any location or device.
- **Quote:** *"Cortado Corporate Server has helped us significantly improve productivity. Throughout the whole installation, Cortado provided us with unmatched customer support and helped us build the IT infrastructure and quickly resolved any problem along the way." Robert Scott, Technical Services Manager, Aurora Fashions*
