

Worldwide Fashion*

Documents always up to date

- **Mission:** The sales reps of the international fashion chain Worldwide Fashion are to be given the ability to print documents in any branch office with an iOS or Android device or to transmit them to other branches.
- **Solution:** In addition to MDM, mobile application management and mobile access to files, Cortado Corporate Server enables flexible printing from all mobile devices and provides the right printing option for any situation, both on network printers and public Wi-Fi printers. So documents can be printed out in any branch office as desired.
- **Testimonial:** “Before, when our employees visited a branch office, they had to think carefully about which documents they would need on-site. Thanks to the mobile printing solution from Cortado, our productivity in the field has improved significantly.”
